

Puppy Weight Tracker

A simple printable record for following your puppy's growth week by week.

Puppy's name		Breed / mix	
Expected size	Toy / Small / Medium / Large / Giant	Starting date	

Weekly weight record

Weigh your puppy at roughly the same time of day when practical. Look for the overall trend rather than worrying about one isolated number.

Date	Age (weeks)	Weight (lb / kg)	Change	Notes

A useful little habit

Keep this tracker with your puppy's records and compare the pattern with the appropriate puppy weight chart. Growth spurts and plateaus can happen, so a single weigh-in rarely tells the whole story. If your puppy is gaining or losing weight unexpectedly, or you are concerned about body condition or growth, speak with your veterinarian.
